**MID FLORIDA EYE CENTER UNVEILS THE LATEST LENSX®
LASER CATARACT SURGERY SYSTEM**

MOUNT DORA, Fla., April 4, 2013 – Mid Florida Eye Center is the area's first eye care center to unveil the latest LenSx® Laser Cataract Surgery system. For area residents, this means more options for increasing their chance of freedom from glasses.

The LenSx® Laser Cataract Surgery system is the most advanced bladeless cataract surgery technique available today. The system automates some of the most complex steps of cataract surgery, giving surgeons increased accuracy. It also gives surgeons the ability to reduce astigmatism—a condition caused by the distortion of the cornea or natural lens that can remain after traditional cataract surgery.

The older model of the LenSx® Laser Cataract Surgery system has been available in the area for months, but the new model offers additional features. "We chose to wait for the later model because of its improved patient interface, increased laser accuracy, and better functionality," said Dr. Jeffrey D. Baumann, Mid Florida Eye Center's co-founder and one of the practice's cataract specialists. "We're really excited to be able to eliminate some of the variables that have complicated cataract surgery in the past."

He added, "It's a truly customized lens replacement procedure—especially when combined with our surgeons' expertise and our selection of advanced technology lenses."

This advanced model of the LenSx® Laser Cataract Surgery system is available at Mid Florida Eye Center's Surgery Center of the Villages. "Bringing revolutionary procedures to our patients is at the core of our eye care philosophy," explained Dr. Baumann. "We're always looking ahead."

To learn more about the new LenSx® Laser Cataract Surgery system or to schedule a consultation, call Mid Florida Eye Center at 1-888-820-7878 (toll free) or 352-735-2020.
